

SolaReflect

SolaReflect is an elastomeric acrylic-based coating system for external masonry wall surfaces that is formulated with solar-reflective pigments. The coating reflects near-Infrared (NIR) rays before it turns into heat, thus lowering heat build-up. This reduces the energy required to cool down the interior of a building.

Characteristics

Resin	Acrylic	
Type	Water-based	
Finishing	Low Sheen	
Application	Roller, Brush, Airless Spray	
Painting System	3-coat System	3-coat System (Designed for Fresh Plaster)
	1 coat SolaReflect Sealer Primer White	1 coat Expresskote
	2 coats SolaReflect	2 coats SolaReflect
