

METALLUX

Create a durable, metallic finish with Nippon Paint Metallux.

A single component air drying coating based on alkyd chemistry that can be applied directly onto rusty metal surfaces and wood to achieve longer protection period. Its striking, intense colours make it easy to give metals a warm glow, or wood a cool, glossy metallic finish. Providing excellent coverage and corrosion resistance, it also acts as both primer and topcoat for ferrous metal surfaces.

Smooth Metallic Finish

Easy Application by Brush/Roller

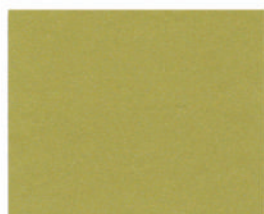

For Metal & Wood
